Reticle Overlay

Update Manual

Version 2026.05.12.002

© 2026 Matthew Pittman

Reticle Overlay is a transparent always-on-top crosshair overlay for Windows. It draws a configurable reticle - cross, dot, X, or circle - centred on your screen or tracking your cursor, with no focus capture and full DirectX game compatibility. Built for FPS training, precision aiming, streaming, and accessibility.

1 What's New in v2026.05.12.002

This release resolves the Light-theme focus-ring contrast failure (WCAG 2.2 AAA audit) and adds per-shape gap control and circle ring thickness.

1.1 Critical Accessibility Fix

* **CRITICAL - Light-theme focus ring (SC 1.4.6 AAA)** - FocusRingBrush in Themes/Light.xaml changed from #996600 (5.9:1 - FAIL) to #6B4700 (7.3:1 - PASS).
* **BrushDisabled Dark theme headroom** - Shifted to #A8A8A8 (7.6:1) for 0.5-ratio margin above the 7:1 floor.
* **Light BrushDisabled verified** - #595959/#FFFFFF = 7.0:1. Passes AAA; documented in theme comments.

1.2 Reticle Improvements

* Reticle gap (centre deadzone) now independently configurable per shape.
* Circle shape supports configurable ring thickness (1-8px).
* Opacity lockable independently of main window opacity control.
* New 'Follow cursor' mode: reticle tracks the mouse pointer rather than staying screen-centred.

1.3 Bug Fixes

* Reticle position no longer drifts on secondary monitors with fractional DPI scaling.
* Overlay re-initialises correctly after monitor connect/disconnect without app restart.
* Colour picker now correctly previews reticle colour in real time.
* Preset load no longer resets reticle opacity when only the colour changes.

2 System Requirements

Requirement	Minimum	Recommended
OS	Windows 10 (1809+) x64	Windows 11 x64
.NET runtime	None - self-contained	None - self-contained
RAM	32 MB	64 MB+
Display	1024x600	1920x1080+
GPU	Any DirectX 9+	DirectX 11+ recommended

Note: No .NET runtime installation required. The executable is fully self-contained.

3 Update Instructions

3.1 Installer Update

* Close **Reticle Overlay** if running (check system tray).
* Download **ReticleOverlay_Setup.exe** from the release page.
* Run installer. Detects existing installation and upgrades in-place.
* All settings, presets, and preferences are preserved.
* On first launch a **What's New** dialog highlights changes in this version.

3.2 Portable Update

* Download **ReticleOverlay_Portable_<version>.zip**.
* Extract to a temporary folder.
* Copy **ReticleOverlay.exe** over the existing portable executable.
* Your **Data** folder (settings, presets, logs) is untouched.

3.3 Silent Update

```
ReticleOverlay_Setup.exe /S
```

Installs or updates silently. Suitable for managed deployment.

3.4 Rollback

Run a previous version's installer to downgrade. Settings are preserved. Versioned builds are in the **Builds** subfolder of the project.

4 Feature Overview

Feature	Detail
Reticle shapes	Cross, X, Dot, Circle - each independently configurable.
Colour	Full RGB picker with live preview; alpha (opacity) channel support.
Size and thickness	Arm length 10-200px; stroke width 1-8px; gap/deadzone 0-40px.
Screen-centred	Reticle locked to display centre - works in all game modes.
Follow-cursor	Reticle tracks the mouse pointer in real time.
Always on Top	Stays above fullscreen DirectX and Vulkan applications.
No focus capture	Overlay never takes keyboard or mouse focus from the active app.
Multi-monitor	Correctly positioned across all DPI configurations.
5 named presets	Store reticle style, colour, size, and opacity per slot.
Global hotkeys	Toggle, cycle shape, opacity up/down - fully remappable.
Tray icon	Minimise to tray; right-click for quick preset access.
WCAG 2.2 AAA	7:1 contrast, 44px targets, 2px Gold/Cyan focus rings.

5 Accessibility (WCAG 2.2 AAA)

This application targets WCAG 2.2 Level AAA across all interactive surfaces.

Criterion	Implementation
Contrast (SC 1.4.6 AAA 7:1)	All text tokens >= 7:1 on Dark and Light themes. Fixed in this release.
Non-text contrast (SC 1.4.11)	Focus rings >= 3:1; slider indicators use glyph + stroke.
Touch targets (SC 2.5.5 AAA 44px)	All interactive controls MinHeight=44 MinWidth=44.
Focus appearance (SC 2.4.11 AAA)	2px Gold (dark) / Cyan (light) focus ring on all controls.
No colour-only info (SC 1.4.1)	Status uses text labels alongside colour indicators.
Live regions (SC 4.1.3)	Status text via AutomationPeer LiveSetting=Polite.
Keyboard navigation (SC 2.1.1)	Full Tab navigation; Escape closes all dialogs.

6 Known Issues & Notes

Resize handle - keyboard alternative (advisory)

Bottom-right resize canvas is drag-only. WCAG 2.5.7 AA keyboard alternative planned. Use Win+Arrow window snapping as a workaround.

BrushDisabled Dark theme

Now #A8A8A8 (7.6:1) - passes with margin. Any future palette change should re-verify this token.
